

What's it all about?

Created in 2013

We're only halfway through our 10 Years

So still have lots to do!

Between 2018-2020 We've set aside over

£350,000

towards the things local people have told us are important, such as...

Community Events and Activities

Let's do more fun stuff!

Knit & Natter

Sports

Street Parties

Arts & Crafts Activities

Mums & Toddlers

Christmas Events

Community Choir

Anything Goes!

Volunteering

Many of our residents go above and beyond for others. We want to recognise that, and support those who already volunteer or those who want to do more.

Setting up a volunteers network?

Linking local groups with new volunteers?

Identifying training or courses?

Reducing Loneliness and Isolation

Helping people meet others and bringing our community closer together.

This might be for specific groups such as older people, or those with different needs or abilities. It could be support groups, social clubs or just a meet up in the pub now and again.

Informal Friendly Supportive

Activities and Support for Young People

But what do young people in our area want to do? From one off events to regular clubs, groups and teams, something linked to education or training, or support or advice..... Let's put young people in charge.

This is their money too.

Opportunities for Families

It can be really tough bringing up young children, and families can't often find help or advice when they need it. We want to make sure there's support locally for everyone - might be classes and clubs for families, new networks or support for those with particular needs.

We also need to make sure everyone supporting families in our area is working TOGETHER.

Training and New Skills

How can we help our residents to achieve more and go further - both at work and outside of it?

By asking people what they need to help them progress.

By working with local companies to help make this happen.

We can talk to local employers, make sure our residents have the right skills to work there. Many people want to move into different roles at work but need training - we can help with that too!

Grants - Small and Large

We know that sometimes people and groups need financial support, so we're making a range of grants available.

WHO DECIDES

Local residents will be our 'grants panel' and will award this funding, helping us make the area an even better place to live.

We're also interested in the idea of 'you give you get'. We want to invest in individuals who are committed to our community - we can all benefit!

The RWT Partnership

These residents are our 'face' on the ground, who get really involved in everything and make some of our really important decisions. Led by our Chair, they keep our finances on track, and talk to our Lottery Funders about how we're doing. Supported by two members of staff they also keep an eye on day to day progress, making sure we're always having an impact and bringing about positive changes for our area.

We're always looking for passionate community minded residents to join us, and help make a real difference here.

This is our Phase Three plan - our ideas on what we should focus on for 2018-20 based on what local people have told us, and what we've learned from our earlier work. Our funders support these priorities, and have approved a pot of money for each one. More detail on our budgets is available in our financial plan. Above all we need local residents to make Rudheath and Witton Together Big Local happen!
